General and Additional Information

THE TRUCK AMONG VANS.

Top-class pedigree.

The MAN TGE Next Level is a truck through and through! It comes from a family of trucks, and that's clear for all to see. You can tell straight away that this is a commercial vehicle, built for heavy-duty use. Its applications are almost limitless - a real all-rounder!

With its digital cockpit, the MAN TGE Next Level now offers even more comfort and safety. Whether it's narrow lanes or tough construction sites: The MAN TGE Next Level combines the strength of a truck with the versatility of a van. It features a user-friendly cockpit and smart driver assistance systems such as Turn Assist, as well as application-oriented configurations.

Your feel-good van.

The interior of the MAN TGE Next Level is an absolute game-changer! It's not just comfortable, it's also packed with the latest technology and clever storage solutions. This gives you the freedom to focus on the job in hand. And the fully customisable digital instrument panel is every driver's dream come true, giving you access to all the information at your fingertips.

A van that thinks along with you.

The MAN TGE Next Level comes as standard with a whole range of assistance systems to make your day-to-day work noticeably easier. And that's not all: Thanks to enhanced assistance systems you can now travel with the reassurance of having a passenger who always keeps an eye on other vehicles, traffic signs or blind spots. In an emergency, these functions can intervene directly within the limits of the system to keep the vehicle in its lane or bring it to a halt - for added safety and comfort.

Infotainment to go.

The MAN Media Van infotainment system fitted as standard is a true all-rounder! The innovative system impresses with a range of practical extras that will make every-day driving noticeably easier. Most importantly: The infotainment system comes with DAB+, Bluetooth and MAN SmartLink as standard. The infotainment display serves as a command centre in the vehicle and allows vehicle functions to be controlled. The MAN Media Van Navigation and MAN Media Van Navigation Business options offer you additional features such as navigation with live traffic data, web radio and media streaming as well as intelligent voice control.

Feel at home. At work.

The ergonomic cockpit features an innovative multifunction steering wheel with well-designed and user-friendly fittings. The central, free-standing infotainment display makes it easy to operate vehicle functions. The clearly arranged cockpit gives you the perfect all-round view for relaxed driving.

The MAN TGE stands for proven MAN truck know-how, which is reflected in every detail of the vehicle. As with our truck models, the TGE model and type designation is mounted on both sides of the vehicle above the mudguards and follows the same structure as the trucks: series, tonnage and engine output (e.g. TGE 3.180).

Wheel rims with the MAN gene.

With the wheel rims for the MAN TGE, you are in good company. Benefit from a selection that impresses in terms of both style and functionality.

Light alloy wheel rims¹:

For a sporty look and lower weight.

Black light alloy wheel rims¹:

For a sporty look and lower weight.

Steel wheel rims with full hub caps¹:

For a robust yet attractive look.

Steel wheel rims with chrome wheel centre caps¹:

For a classic and functional aesthetic.

Black steel wheel rims^{1,2}

For a sporty look.

MAN Approved.

The MAN TGE stands for robustness and durability, ensured by our high quality standards throughout the vehicle's life cycle.

Distinctive design from front to rear.

The MAN radiator grille with its distinctive chrome insert and high-gloss grille as well as the MAN lion at the rear centre make the TGE a true MAN family member. These striking design elements round off the overall appearance of the vehicle and impressively underline the high quality and long-standing heritage of MAN.

Lion-powered inside.

The same MAN DNA is also found inside. The TGE is fitted with MAN-specific seat covers and the steering wheel bears the iconic lion emblem. When the infotainment system is switched on, the MAN lion proudly appears on the start screen. The vehicle keys also feature the distinctive lion logo.

Brings colour to the road.

The MAN TGE is available in a total of nine standard colours that are characterised by their versatility and timeless elegance. In addition, the MAN TGE offers a wide range of special paint finishes to give your vehicle that special touch.

Thanks to the wide range of colours and the possibility of individual design, the MAN TGE is not only a reliable partner in everyday life, but also makes a statement on the road. Whether for commercial or private use, the MAN TGE leaves nothing to be desired in terms of design, comfort and safety.

PANEL VAN.

A van that gets the job done.

The MAN TGE Next Level is a real all-rounder! With an impressive cargo volume of up to 18.4 m³, it is up to almost any challenge. And thanks to the lashing eyelets embedded in the floor and the lashing rails on the floor, walls and ceiling, you can stow your load safely and securely in place - for smooth and safe transport!

MAN TGE CHASSIS.

Tailored to suit.

The MAN TGE chassis is the perfect basis for customised superstructures. We work with our qualified body builders to equip our powerhouse with everything you need - be it a tipper, skylifter or rescue vehicle. The MAN TGE Next Level is ready for action.

CAMPER VAN.

Have a nice va(n)cation!

The MAN TGE camper van is the essence of an unforgettable holiday! With its innovative assistance systems it is the perfect companion on all roads. The configuration of the camper van carries this through to the living area. With everything a camper heart could desire, it offers comfort on and off the road - a real highlight for anyone looking for adventure!

MINIBUS & COMBI VAN.

Small bus. Great comfort.

The MAN TGE minibus and MAN TGE combi van offer first-class comfort and maximum flexibility. With a range of different seating arrangements, air conditioning, equipment and conversion options, it is the ultimate all-rounder. Whether as an elegant VIP shuttle, a school bus or a regular service bus, the TGE minibus and TGE combi van are your ideal companions. You can even drive the TGE combi van with up to eight seats plus driver with a category B driving licence.

FEEL **AT HOME.** AT WORK.

INTERIOR DESIGN.

Your feel-good van.

The interior of the MAN TGE Next Level is an oasis of well-being! You'll love your workplace - from the beginning to the end of the working day. You can sit comfortably and keep an eye on everything that matters. State-of-the-art technology helps you get the job done and provides maximum comfort. So you can relax and concentrate on the task at hand.

The free-standing infotainment display is your command centre for everything you need on the road: entertainment, essential vehicle functions and navigation. The cockpit is clearly organised with plenty of storage space. Your smartphone can be stored safely as the automatic gear lever is mounted on the steering column. This saves space and makes operation a breeze.

1 Digital instrument panel

4 Electronic parking brake

5 MAN Media Van with 10,4" or optional with 12,9" display¹

6 USB-C charging interface

7 Inductive charging cradle

3 Keyless Start

2 Ergonomic multifunction steering wheel

6 USB-C interface

¹ 12,9" display only available with MAN Media Van Navigation Business

1. Digital instrument panel

All important details always in view - the new digital instrument panel makes it possible! It can be customised and shows you everything you need to know at a glance: Speed, mileage, fuel level, coolant temperature and much more.

2. Ergonomic multifunction steering wheel

The comfortable multifunction steering wheel puts all the important functions at your fingertips, providing a superior driving experience and optimum control on any route.

3. Keyless Start

Forget about the key! Start and stop your MAN TGE Next Level at the touch of a button. You can leave the key in your pocket without having to worry about it.

4. Electronic parking brake

The comfortable multifunction steering wheel puts all the important functions at your fingertips, providing a superior driving experience and optimum control on any route.

5. MAN Media Van

With the MAN Media Van infotainment system you have everything in view and many useful functions on board. A DAB+ tuner and a Bluetooth interface for smartphone connection are standard. And with the MAN Media Van Navigation¹ or MAN Media Van Navigation Business¹ options you can reach your destination without detours and with the best possible entertainment along the way.

6. USB-C interface

Why not charge your smartphone while driving? With two USB-C interfaces, you can charge your mobile devices and transfer data in no time at all. A further USB-C interface with charging function is located on the roof console facing the passenger side and in the centre storage compartment of the dashboard as standard.

7. MAN SmartLink

With MAN SmartLink the smartphone is seamlessly integrated into the infotainment system and can be controlled directly via the display. Download the best apps to the on-board display and operate them directly from there - conveniently and clearly. Android Auto[®] and Apple CarPlay[®] give you full control. And if that's not enough, you also receive an inductive charging cradle as standard.

8. Automatic gear lever

Even when things get a bit hectic on the road, you can still enjoy maximum driving comfort! That's because the new automatic gear lever is easy to operate without taking your hands off the wheel. It is now located on the steering column, creating more space in the cab, while ensuring a perfect driving experience and enhanced safety.

¹Optional equipment at extra cost.

MAN MEDIA VAN.

Infotainment to go.

The standard MAN Telematics box opens up a whole world of possibilities! It gives you access to a wide range of online services perfectly tailored to the needs of different applications.

The MAN Media Van infotainment system is available in three versions with two display sizes: MAN Media Van (10.4" display), MAN Media Van Navigation¹ (10.4" display) and MAN Media Van Navigation Business¹ (12.9" display). The three versions of the infotainment system intuitively combine control of driving functions, radio, telephone and more.

Enjoy your favourite music from your smartphone or via DAB+ in the highest sound quality! The MAN Media Van infotainment system with media streaming and web radio² ensures a unique music experience. And with the right upgrade you can even enjoy your own personal playlist!

Both MAN Media Van Navigation¹ and MAN Media VAN Navigation Business¹ support live traffic data and apps.

¹ Optional equipment at extra cost.

² 2 years included from vehicle purchase.

³ Only with MAN Efficient Route Package (free for 2 years from purchase)

MAN CONNECT CALL SERVICES.

There are times when every second counts. So it's good to know that thanks to digital call services via the 3-button module¹ in the roof console, you can organise help in no time at all.

Help at the touch of a button.

Together with the MAN Telematics box with integrated eSIM card, the 3-button module in the roof console is your reliable companion in all situations - whether in emergencies, for breakdown assistance or for technical questions about the vehicle and its operation. In the event of an emergency call, you can be immediately connected to the right person at the touch of a button - or when the airbag deploys. There's no need to search for phone numbers - you'll be connected quickly, without the need for an additional mobile phone.

The 3-button module in the roof console is compatible with all infotainment systems.

MAN info call:

If you have any questions about your vehicle while you are on the road, you can reach an employee at the MAN Mobile24 call center by pressing the "i" button. The language settings in the infotainment system will ensure that you always reach an agent who speaks your language.

MAN breakdown call:

In the event of a breakdown, press the button with the spanner symbol. You will be connected directly to a Mobile 24 call center employee who speaks your language. At the same time, the system automatically transmits your location and the fault codes. This enables the MAN Mobile24 employee to inform the nearest MAN workshop and initiate a quick diagnosis and repair.

Emergency call (EU emergency call):

If the airbags are deployed in an accident, a voice connection to the emergency call centre is automatically established via the emergency number 112. You can also activate the call manually using the red SOS button, for example in a medical emergency. In this case too, the system automatically transmits the location of the vehicle and other information required by law, so that rescue operations can be carried out more quickly and efficiently.

¹ Not available with chassis for special bodies (e.g. cowl).

NEXT LEVEL CLIMATE COMFORT.

Would you like a van-tilator?

The MAN TGE is the epitome of comfort! It helps to keep the interior climate pleasant at all times, so you can arrive at your destination relaxed. And the best part? It's not just the driver who benefits from first-class air conditioning - the co-driver and the cargo space or passenger area do too! The TGE combi van and minibus offer separate climate control for the passenger area. With tinted and heat-insulating glazing, you can improve the interior climate even further. The MAN TGE Next Level also performs well on cold days. With integrated seat heating¹, the MAN TGE ensures an optimal climate, regardless of operating and weather conditions!

Heating/ventilation

The basic version of the MAN TGE has a heating and ventilation system.

Climatic (manual)¹

The infinitely variable air conditioning keeps you cool – even on hot days.

Climatronic (automatic)¹

Individually adjustable temperature control for driver, co-driver and cargo or passenger area provides comfort and favourable temperatures. An optional ventilation sensor, automatic air recirculation and auxiliary heater ensure optimum climate conditions in the cargo area. Additional air outlets in the roof panelling provide air where it's needed.

Seat heating¹

The MAN TGE is a reliable everyday companion even on cold days thanks to the integrated seat heating, which quickly spreads pleasant warmth without creating draughts.

¹ Optional equipment at extra cost.

STORAGE SYSTEM.

Everything you need at your fingertips.

At MAN, we know exactly what you need to get your job done, and we have made it our mission to give you the best possible commercial vehicle. Inside the MAN TGE Next Level, everything has been carefully thought out and organised. There is a place for everything: the ruler, the work gloves, the tablet with your repair and maintenance contracts and even your coffee cup!

Storage compartments under the windscreen, in the doors and in the spacious glovebox are easily accessible. In addition to the dual-function module, there is a 12V socket available, which can be expanded with a cigarette lighter¹ on request. There is also an optional practical socket in the left seat frame – available with either 12V or 230V¹.

¹ Optional equipment at extra cost.

NEXT LEVEL SEATING COMFORT.

Crew cab rear bench seat. Because everything is easier together: The crew cab rear bench seat can accommodate up to four additional passengers.

"Comfort Plus"¹ driver's seat. The electrically adjustable driver's seat "Comfort Plus" with folding armrests on both sides and 4-way lumbar support adjusts to the driver's body for maximum comfort on long journeys.

Take a seat! In the seat of your choice!

With six seat variants - "Standard", "Comfort"¹ and "Comfort Plus"¹ - you can turn a long day's work into a pleasure. Choose your favourite seat - whether it's the swivel seat¹ or the ergonomic "ergoComfort"¹ seat with the AGR quality seal². For even more comfort, you can even equip the "ergo Comfort" seat as "ergoActive"¹ with a relaxing massage function.

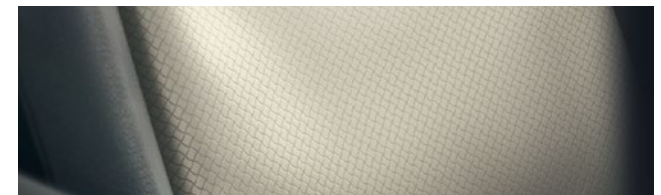

You also have a wide choice of seat covers. The MAN TGE Next Level comes with the high-quality "Toronto Grid" seat cover as standard, but you can also choose between the extremely hard-wearing and durable seat cover in robust "Marathon"¹ fabric or the high-quality "Mesh"¹ artificial leather seat cover as optional extras - for even more style on every journey.

Seat cover "Toronto Grid"

Seat cover "Marathon"

Seat cover "Mesh"

¹ Optional equipment at extra cost.

² Awarded by Aktion Gesunder Rücken e.V. Tested and recommended by the Bundesverband deutscher Rückenschulen e.V. and the Forum Gesunder Rücken - besser leben e.V.

³ Colour variations possible due to printing process.

A white MAN TGE van is shown from the side, driving on a paved road that curves through a lush, green mountain landscape. The background features dense evergreen forests and distant, hazy mountain peaks under a clear sky. The van is positioned on the left side of the frame, moving towards the right.

A VAN THAT THINKS ALONG WITH YOU.

Invisible but essential.

The MAN TGE Next Level features innovative assistance systems, such as the advanced Turn Assist. These systems support the driver within the system limits, increasing safety and minimising downtime, which reduces follow-up costs and ensures greater vehicle availability. Furthermore, the MAN TGE is effectively protected against digital manipulation.

With the MAN TGE Next Level, you have your very own personal co-pilot! A whole team of assistance systems is ready to support the driver in his challenging task in daily traffic - for an even safer and more comfortable driving experience. Within the limits of the system, it ensures that the driver does not fall asleep, keeps the vehicle in lane or even initiates emergency braking if necessary. In addition to the safety-related assistants, there is also a wide range of comfort functions available, such as the Intelligent Speed Assist. If you would like even more support, you can now take driving comfort to the next level with additional optional functions for active and passive road safety.

EXPECT AN ASSISTANT AT YOUR SIDE. OR EVEN **A FEW MORE.**

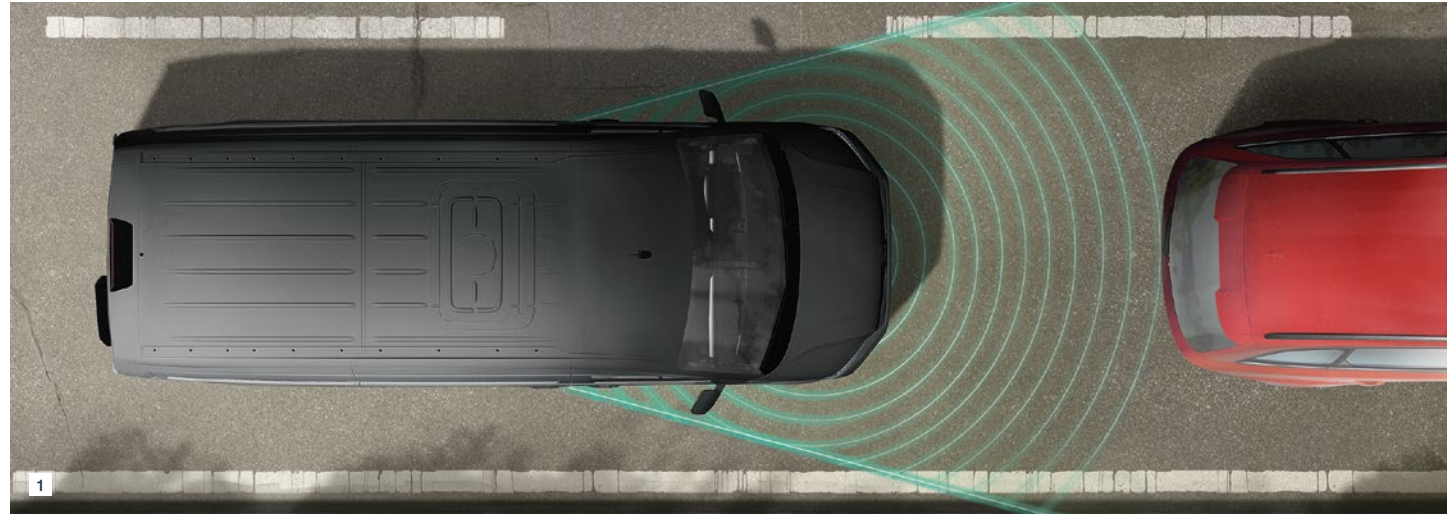

The MAN TGE Next Level sets new standards in terms of serial assistance systems to give the driver, co-driver and other road users the best possible protection. These include Active Lane Keeping Assist, Intelligent Speed Assist, Drive Off Warning¹ and Blind Spot Warning¹.

But that's not all: The MAN TGE also offers a wide range of innovative assistance systems to make your everyday work easier. Whether parking, driving off, reversing, turning or manoeuvring, your invisible co-pilot is always at your side and has an extra pair of eyes ready to help. This not only makes your job easier, it makes it safer too.

1. Emergency Brake Assist (standard)

The Emergency Brake Assist (EBA) helps avoid collisions with the vehicle in the front. It assists the driver with automatic braking and provides visual and acoustic warnings if the distance is too short. It can also initiate automatic emergency braking¹. Plus, the integrated pedestrian and cyclist detection further increases road safety.

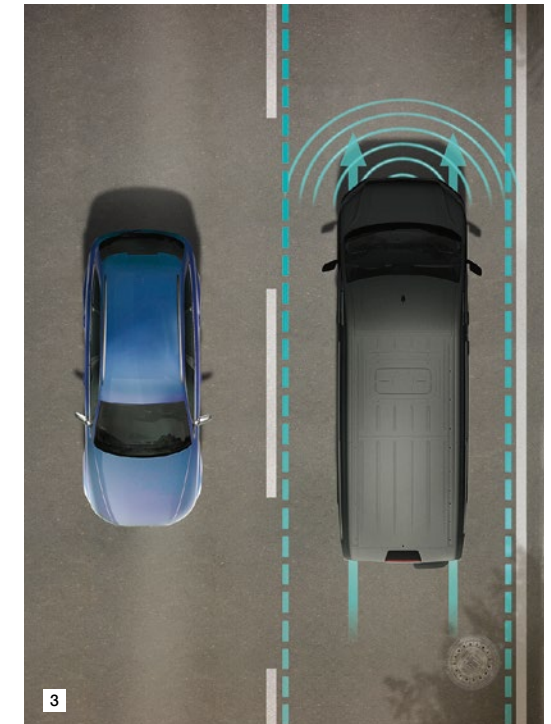

2. Traffic Sign Information (standard)

The Traffic Sign Information records current signals and traffic signs via the multifunction camera or from the navigation and route data and shows them to the driver on the infotainment display and in the digital instrument panel. This means that nothing important escapes the driver's attention. An EU-Intelligent Speed Assist determines the speed limit and emits a visual and acoustic warning signal if the speed limit is exceeded based on the traffic signs detected and route data looking ahead.

3. Active Lane Keeping Assist (standard)

As if there were a second driver: the Active Lane Keeping Assist helps the driver to keep the vehicle in its lane. The course of the lane boundaries is recorded by a camera. If necessary, the system helps with steering interventions. In addition, the system warns by means of steering wheel vibration or an acoustic signal if a lane marking is crossed unintentionally.

¹ With automatic transmission and at speed of up to 30 km/h automatic emergency braking to a standstill.

4. Drive Off Warning^{1,3}

Drive Off Warning always helps you get off to a good start. It uses radar sensors to monitor the area in front of the car. This makes it much easier to avoid collisions with pedestrians or cyclists when pulling away. The monitoring range of the collision warning can be supplemented by the Blind Spot Warning^{2,3} on the left side, on the right side or on both sides.

5. Cruise Assist¹

This assistance system uses a combination of ACC Stop & Go, Active Lane Keeping Assist and Traffic Jam Assist to help the driver maintain distance, speed and lane position. The MAN TGE Next Level actively intervenes in events with semi-automatic control of braking and acceleration processes and lateral steering wheel movements for lane keeping. This ensures safe transport within the limits of the system.

6. Cruise Assist Plus^{1,5}

This system is an extension of the Cruise Assist to include the Emergency Assist, which also brakes automatically to a standstill within the limits of the system.

7. Emergency Assist⁴

Call it a guardian angel. We call it Emergency Assist. It permanently monitors whether the driver is operating the steering wheel, gas and brake pedal. In the event of a health impairment or loss of driving ability, the driver may no longer be able to act. In this case, the Emergency Assist takes over vehicle control to bring the vehicle to a stop and then secures it by activating the hazard warning lights and other safety functions.

8. Blind Spot Warning^{2,3}

As if there were an extra pair of eyes. Radar sensors monitor the blind spot area next to the vehicle (left or right, depending on the position of the steering wheel, or optionally on both sides). This significantly reduces the risk of collision with other road users, especially when turning.

9. Turn Assist¹

The Turn Assist monitors oncoming traffic within the system limits during a turning manoeuvre. This advanced system can now also detect when an oncoming vehicle crosses the expected lane of the turning vehicle. If an impending collision is detected, the system automatically initiates braking due to the short reaction time, while simultaneously warning the driver with an acoustic signal.

¹ Optional equipment at extra cost.

² Standard for vehicles over 3.5 t, N2.

³ Optional for vehicles with 3.5 t, N1.

⁴ Only available with Cruise Assist Plus, therefore available for vehicles with automatic transmission only.

⁵ Available for vehicles with automatic transmission only.

Crosswind Assist: Helps the driver stay safely in lane when there is a crosswind or when the road slopes to one side.

Fatigue Detection: The system identifies any signs of driver fatigue by detecting deviations from normal driving behaviour and prompts the driver to take a break with an acoustic and visual signal.

High Beam Assist¹: High beam assist analyses light conditions and switches the high beams on and off (partially) automatically if the system detects vehicles ahead or oncoming. This prevents other road users from being dazzled.

Light/Rain Sensor¹: The system automatically controls the headlamps and windscreen wipers in dark, rainy conditions.

Hill Ascend Assist: Prevents the vehicle from rolling backwards, helping you to move off on uphill gradients.

Parking Assist: It uses acoustic and visual signals to inform the driver of the distance to the front and rear of the vehicle when parking and manoeuvring.

Park Steering Assist¹: The Park Steering Assist helps drivers park in parallel and perpendicular spaces. First, sensors detect the parking space and display its suitable size to the driver. During assisted parking, the driver operates the accelerator and brake pedals while the parking assistant takes control of the steering. If the car is going too fast or a collision is imminent, the system will automatically initiate emergency braking.

Rear View Camera System with dynamic guidelines¹: This function provides the driver with a view to the rear directly onto the free-standing infotainment display. Dynamic guidelines improve orientation and continuously adapt to the route. For vehicles without a parking aid, e.g. box bodies with tail lifts, the reversing camera fulfils the legally required rear area monitoring.

ABS and ESP: The Electronic Stability Program (ESP) is an extension of the Anti-Lock Braking System (ABS). It initiates targeted braking of individual wheels to prevent the vehicle from skidding.

Find out more about our assistance systems

¹ Optional equipment at extra cost.

Various equipment packages¹ are available ex works at an attractive price.

SAFETY PACKAGES.

Active safety package²:

- Exterior mirror, electrically adjustable, heated and foldable
- Lane Change Assist
- Traffic Jam Assist (incl. Active Lane Keeping Assist)
- ACC Stop & Go
- Fog lights, including cornering light
- Blind Spot Warning, both sides, and Drive Off Warning
- Leather multifunction steering wheel, heated

Light and visibility package³:

- "Light Assist" high beam assist
- Daytime running lights with assistance driving lights
Coming-home and leaving-home function
- Fog lights, including cornering light
- LED main headlights with LED daytime running lights

Cruise Assist³:

- ACC Stop & Go
- Traffic Jam Assist (including Active Lane Keeping Assist)
- Leather multifunction steering wheel, heated, for manual transmission

Cruise Assist Plus⁴:

- ACC Stop & Go
- Emergency Assist (incl. active Lane Keeping Assist and Traffic Jam Assist)

COMFORT PACKAGES.

Comfort package⁵:

- Premium interior noise reduction measures
- "Comfort Plus" seat, left

Comfort Plus package⁵:

- Chrome package
- Multifunction steering wheel, heated
- "ergoActive" suspension seat, left
- Premium interior noise reduction measures
- Step lighting

Winter package⁵:

(only available with air conditioning Climatic or Climatronic)

- Auxiliary water heater, programmable, with radio remote control
- Headlight cleaning system, with windscreen washer fluid level indicator, with heated windscreen washer nozzles at the front
- Seat heating, left and right, separately adjustable
- Heat-insulating laminated glass windscreen, heated

MAN Media Van Navigation package³:

- MAN Media Van Navigation (10.4")
- Navigation system (Baseline)
- MAN Connect, with OCU high
- Voice control

MAN Media Van Navigation Business package³:

- MAN Media Van Navigation Business (12.9")
- Navigation system (Baseline)
- MAN Connect, with OCU high
- Voice control

¹ Country-specific deviations possible.

² For panel van and base vehicle camper van.

³ For panel van, base vehicle camper van and all chassis.

⁴ For panel van, base vehicle camper van and all chassis, with automatic transmission.

⁵ For panel van and all chassis.

INDUSTRY-SPECIFIC PACKAGES.

Tipper construction package - preparation¹:

- Electrical clamping rail and CFCU with body builder programming
- Preparation for trailer tow hitch (without cable set, socket, mounting bracket)
- Rear window
- Safety inside mirror, dimming
- Preparation for tipper
- Mud flap, front
- Clearance lamps on the roof, front
- Second battery (AGM battery) with cut-off relay and battery monitoring
- Base suspension/damping and stabilisation reinforced version

Platform body construction package¹:

- Preparation for trailer tow hitch (without cable set, socket, mounting bracket)
- Rear window
- Safety inside mirror, dimming
- Flatbed with aluminium side walls, lashing eyelets, step
- Clearance lamps on the vehicle roof, front

Driver assistance city package³:

- Reversing camera system with dynamic line guidance
- Exterior mirror, electrically adjustable, heated and foldable
- Lane Change Assist
- Side marker lights
- Blind Spot Warning on both sides and Drive Off Warning
- Turn Assist

Box with tail lift distribution package - preparation⁴:

- Slim end cross member, 1,149 mm long and 225 mm high, bolted
- Liftgate preparation, mechanical and electrical
- Position lights on roof, front
- 2nd battery (AGM battery) with cut-off relay and battery monitoring
- Preparation for rear lights with extended cable (cable length +1.5 m)
- Preparation for cargo space lighting
- Left exterior mirror with extended mirror arm, convex, with integrated LED indicator light and wide-angle range
- Right exterior mirror, with extended mirror arm, convex, with integrated LED indicator light and wide-angle range
- Base suspension/damping and stabilisation reinforced version

Box without tail lift distribution package⁴:

- Clearance lamps on the vehicle roof, front
- Preparation for cargo space lighting
- Left exterior mirror with extended mirror arm, convex, with integrated LED indicator light and wide-angle range
- Right exterior mirror, with extended mirror arm, convex, with integrated LED indicator light and wide-angle range
- Base suspension/damping and stabilisation reinforced version

Cargo space package²:

- Rear step, over the entire width
- Cab doors, additionally with reinforced door hinges on the driver's side
- Wooden floor in the cargo space with loading sill protection, at the rear
- Interior side panelling in the cargo space made of plastic hollow chamber panels, up to the roof frame
- Rear wing doors with larger opening angle
- Side marker lights
- Lashing rails (Airline) in the cargo space: Side walls and partition wall

¹ For chassis cab and crew cab.

² For panel van.

³ For panel van and base vehicle camper van.

⁴ All chassis.

A **VAN**TASTIC ALL-ROUNDER.

The van with (almost) unlimited possibilities.

We at MAN have been building commercial vehicles for over hundred years, so we know exactly what you need for your daily business. That's why we offer our MAN TGE Next Level with a wide range of body solutions ex works: as a platform, tipper or box body, with built-in shelving system or as a turnkey van-to-go in various versions. And if you want even more, we have a large network of qualified body builders who can make almost any conversion or body possible.

It's our top priority to simplify your business – from financing to mobility guarantee.

BODY SOLUTIONS EX WORKS.

Everything from a single source.

We build the MAN TGE Next Level in a range of different body variants ex works. You have the choice between tipper, platform body, box body, TGE with refrigerator and shelving system or for passenger transport. With these body variants, you can easily complete all common transport tasks.

For those who don't want to wait.

With our vans-to-go, we offer a large selection of immediately available complete vehicles ready ex works. With individual bodies for different applications, you can get exactly what you need, when you need it.

Commercial vehicle consulting expertise.

With decades of experience in the commercial vehicle industry, expertise in a wide range of industries and a strong network of top-quality body builders, we can give you expert advice and build the perfect van for you.

1 – Three-way tipper; 2 – Lightweight box body; 3 – Service vehicle with shelving system;
4 – Refrigerated body solution

MAN BODY VERSATILITY.

Ready for your job.

Every job has its own challenges. That's why we've built the MAN TGE Next Level to meet them successfully in a wide variety of situations.

As a commercial vehicle manufacturer with over hundred years of experience and high quality standards, we know what is important to your business. That's why we work with qualified body builders to offer you the ideal commercial vehicle.

Examples of body solutions:

DIMENSIONS AND CARGO SPACE.

A van with ideal dimensions.

The MAN TGE offers the perfect solution for almost any transport task! With two wheelbases, three lengths and four roof heights (normal, high, super-high and camper roof), it is incredibly versatile and boasts a cargo volume of up to 18.4 m³. It also has a lot to offer in terms of length and height: Depending on the version, it is between 5.98 m and 7.39 m long and between 2.35 m and 2.83 m high. With a permissible gross vehicle weight of up to 5.5 t, it is the perfect choice for demanding transport tasks. With the trailer coupling, it can effortlessly tow loads of up to 3.5 t.

The platform body is available ex works in four lengths up to a maximum platform length of 4.7 m so that you can find the optimum solution for your needs. And the chassis or crew cab variants give you even more flexibility, so you can get exactly the transport solution you need.

The cargo space has a sturdy wooden floor¹ or a universal floor¹ on which you can easily fit and remove your own shelving system.

Standard LED lighting illuminates the cargo space so you can always see what is inside. As an option, you can install practical lashing rails on the floor, wall and ceiling. Optional plywood or hollow plastic wall panels provide extra protection.

Interior conversions:

1. Preparation for conversions

Do you want to convert your MAN TGE yourself? We can equip your vehicle with hexagon holes for M6 screw fittings for you.

2. Low loading sill

100 mm², which you can feel when loading and unloading your MAN TGE. This is how much lower the loading sill is on vehicles with front-wheel drive. The optional full-width step or half-sided step, when connected, can also help to make work easier.

3. Lashing rails¹ and eyelets

To keep your valuable cargo safe and secure, the floor is fitted with lashing eyelets as standard. If required, we can also fit lashing rails to the floor, ceiling, side walls and partition wall

4. Floor and wall panelling¹

We offer four types of high-quality wall panelling:

- Side interior panelling in cargo space made of hardboard panels, half-height, with partial window panelling
- Side interior panelling in cargo space, up to roof frame
- Side interior panelling in cargo space made of hollow plastic panels, half-height, without partial window panelling
- Plywood wall cladding, up to roof frame

5. Cargo space lighting

With durable, bright LED lights as standard.

6. Door opening angle

The rear doors can be opened at 180° or 270°¹.

¹ Optional equipment at extra cost.

² Value applies to the TGE panel van with front-wheel drive, compared with rear-wheel and four-wheel drive 4x4.

MAN Mobile24

Whether in the urban jungle or in the forest: MAN Mobile24 ensures that you are never alone on the road 24 hours a day, 365 days a year.

In the event of a breakdown, call the standard European emergency number¹: 00800Mobile24 / 00800 66 24 53 24. You will always speak to an expert who can help you in your own language. If necessary, you will be assisted by an MAN service technician from one of the approximately 1,390 cooperating workshops throughout Europe.

To view and track the current breakdown status, you can register for the MAN Mobile24 Tracking Link.

MAN TopUsed

A strong partner for strong vans: With over 30 locations throughout Europe, MAN TopUsed offers you high-quality vehicles at attractive services, including customised financing, trade-ins and a Europe-wide warranty.

Top offers. Top service. TopUsed.

MAN FinancialServices

Financing - Flexible solutions for acquiring MAN vehicles.

Leasing - Cost-effective models for operational flexibility.

Insurance - Custom coverage for commercial vehicles.

The services offered vary by country. They are provided by various subsidiaries of TRATON Financial Services AB, part of TRATON Group.

MAN ProfiDrive

The MAN TGE is your versatile everyday hero. However, you can get even more out of it with trainings from MAN ProfiDrive. Our experienced trainers will show you how to drive more safely, efficiently and cost-effectively. These seminars, specially designed for vans, help reduce operating costs and optimise the driving experience.

Our training areas:

- Driving safety (according to DVR guidelines)
- Efficiency
- Off-road
- Vehicle instruction and technology
- Load/luggage securing
- Van driver qualification (FQT from BG Verkehr)
- Damage prevention
- Risk management
- Instructions for emergency services and rescue personnel

A wide range of training courses can be recognised and certified in accordance with the guidelines for professional driver qualification.

¹ Landline free of charge. Mobile phone charges may vary depending on your service provider.

If your provider does not support freephone numbers, please dial +49 180 53535 3333 (14 cents/min from a German landline. Calls from mobiles and other countries will vary depending on the tariff).

² The service will be available at a later date.

MAN DigitalServices

With MAN DigitalServices, you can quickly and easily access digital fleet and vehicle management. This allows you to sustainably improve the economy and efficiency of your fleet. MAN DigitalServices can be booked via the marketplace on the RIO platform.

Digital services at a glance:

- **Geo** Efficient route planning with extensive navigational materials.
- **MAN ServiceCare S** (free of charge) proactive maintenance management.
- **MAN ServiceCare M**
- **MAN Now** Over-the-air software upgrades. The two-year licence for navigation and traffic data (MAN EfficientRoute) as well as current news and weather data (MAN OnlineNews - free of charge) can be extended via MAN Now.

Find more information at www.digital.man
You can book our digital services at <https://rio.cloud/de/marketplace/man-digital-services>

MAN Service

At MAN, reliability doesn't end when you purchase a vehicle. Our range of individually selectable service contracts, from ComfortOil to ComfortSuper, offer maximum transparency and peace of mind when it comes to maintenance and repairs. Whether you choose powertrain or full warranty cover, you determine the scope of services.

In the event of a breakdown, the MAN mobility guarantee gets you back on the road quickly and easily. Durable MAN Genuine Parts and eco-friendly MAN Genuine Parts ecoline are available for repairs. With the extensive range of MAN Genuine Accessories, you can also upgrade your MAN TGE to suit your needs, whether you're looking for more comfort, protection or functionality.

STRONG PARTNER-SHIP.

MAN Service – your partner for reliable support.

We put our customers first and are committed to not only meeting but exceeding your expectations.

Customer-oriented service for your satisfaction.

Our commitment starts with a thorough understanding of your individual needs. Whether it's maintenance, repair or keeping you mobile, we offer solutions tailored to your specific needs.

Expert knowledge and high quality services.

Our team of highly qualified technicians and service staff is ready to provide you with expert advice and professional support. With state-of-the-art technology and outstanding know-how, we ensure that your MAN TGE is always in top condition.

Comprehensive service for your mobility.

From regular inspections to emergency repairs and flexible opening hours at our MAN service centres - we offer you a comprehensive service that ensures your mobility and gives you the peace of mind that your vehicle is in the best of hands. This also includes MAN Mobile24 – available to you 24/7, 365 days a year, throughout Europe.

Comprehensive sales advice.

Our specialised van sales team focuses on your business and your individual requirements. We understand that buying a commercial vehicle is a significant investment, and we are here to help you find the best solution for your needs. From the initial consultation and throughout the vehicle lifecycle, we provide professional support. Our sales team will guide you through the entire purchasing process, answering your questions and making sure you are completely satisfied with your decision.

Industry expertise of MAN sales team.

Our sales team has extensive industry expertise and works closely with qualified body builders. This cooperation allows us to provide tailor-made solutions to meet your individual requirements. Whether it's specific adaptations or customised equipment, our experienced sales team know the requirements of your industry and is always at your side as a strong and competent partner.

At MAN, we understand the importance of a reliable partnership. We are only satisfied when you are.

DRIVE AND ENGINES.

Power that makes you move.

The MAN TGE Next Level impresses with its powerful diesel engines of the latest generation. The engines are specially tailored to the requirements of the commercial vehicle business, delivering impressive fuel efficiency and a long service life. No matter which transmission or powertrain you choose, the MAN engine will take you wherever you need to go, reliably and efficiently, even in the toughest conditions.

ENGINE-TRANSMISSION COMBINATIONS.

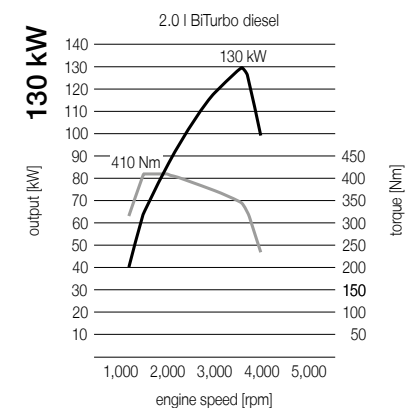

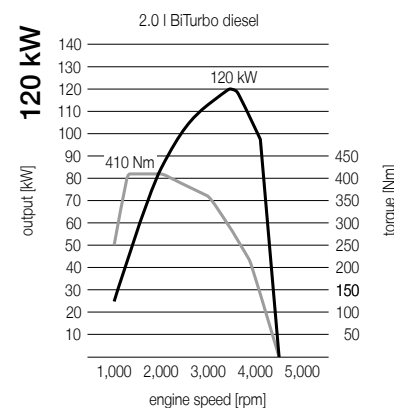

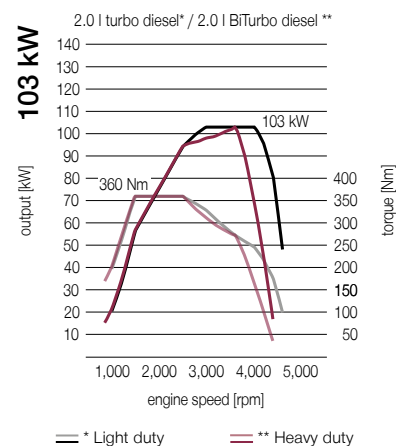

Front-wheel drive	Rear-wheel drive	Four-wheel drive 4x4
- High payload - Towing capacity of up to 3.0 tonnes 100 mm lower loading sill and access height¹ - Large cargo space height - Front engine mounted sideways	- Towing capacity of up to 3.5 tonnes - Small turning circle - Maximum payload - Best traction with high loads - Front engine mounted lengthwise	- Permanently available all-wheel drive - Reliable traction - Safe driving behaviour - Great directional stability - Towing capacity of up to 3.0 tonnes - Front engine mounted sideways
103-kW-engine (light & heavy duty) 6-speed manual transmission/ 8-speed automatic transmission	120-kW-engine (heavy duty) 6-speed manual transmission/ 8-speed automatic transmission	120-kW-engine (heavy duty) 8-speed automatic transmission

GENERAL AND ADDITIONAL INFORMATION.

Vehicle illustrations in this document may include optional extras at extra cost. Please note that some special equipment is subject to certain combination restrictions and/or cannot be combined with other special equipment and is bound by certain legal regulations. MAN expressly accepts no liability for improper use of this equipment.

Some special equipment may result in a longer delivery time for the vehicle. Please discuss your individual requirements with your MAN dealer. Only your MAN partner can check the necessary combination requirements and the accuracy and completeness of the information in the ordering system available to them.

The fact that a trademark is not marked with a ® in this document does not mean that this trademark is not a registered trademark and/or that this trademark may be used without the prior written consent of the MAN Group. The product name AdBlue® is a registered trademark of Verband der Automobilindustrie e. V. (VDA). iPod/iPad/iPhone are trademarks of Apple Inc.

Our vehicles are fitted with summer tyres as standard. Since December 4th 2010, in the Federal Republic of Germany you are legally obliged to fit your vehicle with M+S tyres or all-season tyres in the event of slippery ice, snow, slush or ice. Your MAN partner will gladly advise you.

All information in this document is based on the characteristics of the German market and the knowledge available at the time of going to press.

The engines are equipped with a multi-stage exhaust after-treatment system (diesel particulate filter and SCR catalytic converter). The SCR catalytic converter (Selective Catalytic Reduction) selectively converts the exhaust gas component nitrogen oxide (NOX) into nitrogen (N₂) and water (H₂O) without the formation of unwanted by-products. The conversion takes place using a synthetically produced aqueous urea solution, such as AdBlue® (ISO 22241-1/AUS 32), which is carried in an additional tank. Depending on the vehicle, the customer must also refill the AdBlue® service product himself between service intervals or have it refilled by his MAN partner.

The vehicle unladen weights stated include 68 kg for the driver, 7 kg for the luggage, all operating fluids and 90% fuel, determined in accordance with the current version of Regulation (EU) No. 1230/2012. Equipment or equipment lines may affect the unladen weight. The actual payload of a vehicle, calculated as the difference between the gross vehicle weight and the unladen weight, can therefore only be determined by weighing the individual vehicle.

As the altitude increases, the engine power inevitably decreases. From 1,000 m above sea level onwards and for each additional 1,000 m, 10% must therefore be deducted from the gross combination weight (permissible towing capacity plus permissible gross weight of the towing vehicle).

In the vehicle classes N1, N2, M1 and M2, the refrigerant R1234yf is used in all diesel engines. The GWP value of the refrigerant used is 4 (R1234yf refrigerant). Filling capacities depend on the refrigerant compressor. With one air conditioning compressor, the filling capacities vary between 540 and 560 g. With two air conditioning compressors, the filling capacities vary between 785 and 815 g. The additional roof-mounted air conditioning system of the MAN TGE Intercity and MAN TGE Coach still contains the refrigerant R134a.

The consumption and emissions values given were determined by the legally stipulated measuring procedure. From September 1st 2017, new vehicles are approved by the Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test procedure for measuring fuel consumption and CO₂ emissions. From September 1st 2018, the WLTP also replaced the New European Driving Cycle (NEDC) for light commercial vehicles.

Where consumption and emission values are given as a range, they do not refer to an individual vehicle and are therefore not part of the offer. They are provided for comparison purposes only.

Additional equipment and accessories (add-on parts, tyre format, etc.) can change relevant vehicle parameters such as, for example, weight, rolling resistance and aerodynamics, and along with weather and traffic conditions as well as individual driving behaviour, they can influence fuel consumption, electricity consumption, CO₂ emissions and the driving performance values of a vehicle.

Return and recycling of end-of-life vehicles:

MAN faces up to the challenges of modern society and takes them into account in all new products of the MAN brand. This naturally also applies to the protection of the environment and resources. All MAN TGE can be recycled in an environmentally friendly manner and can generally be returned free of charge, subject to compliance with national legal regulations. Further information on the return and recycling of end-of-life vehicles is available at www.van.MAN/de/de/altautoverwertung.html or from your MAN sales and/or service centre.

Further information can be found in the price list/technical data appendix. This price list contains the legal data relating to REGULATION (EU) No. 540/2014 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of April 16th 2014 and the new tyre label (EU Regulation 2020/740), which represents the labelling of tyres with regard to fuel efficiency, wet grip and noise.
